The event

About #PRES

APREN's annual conference, **Portugal Renewable Energy Summit (#PRES2025)**, returns for another edition on **2 and 3 October 2025**, at **Culturgest's Grand Auditorium**, in Lisbon.

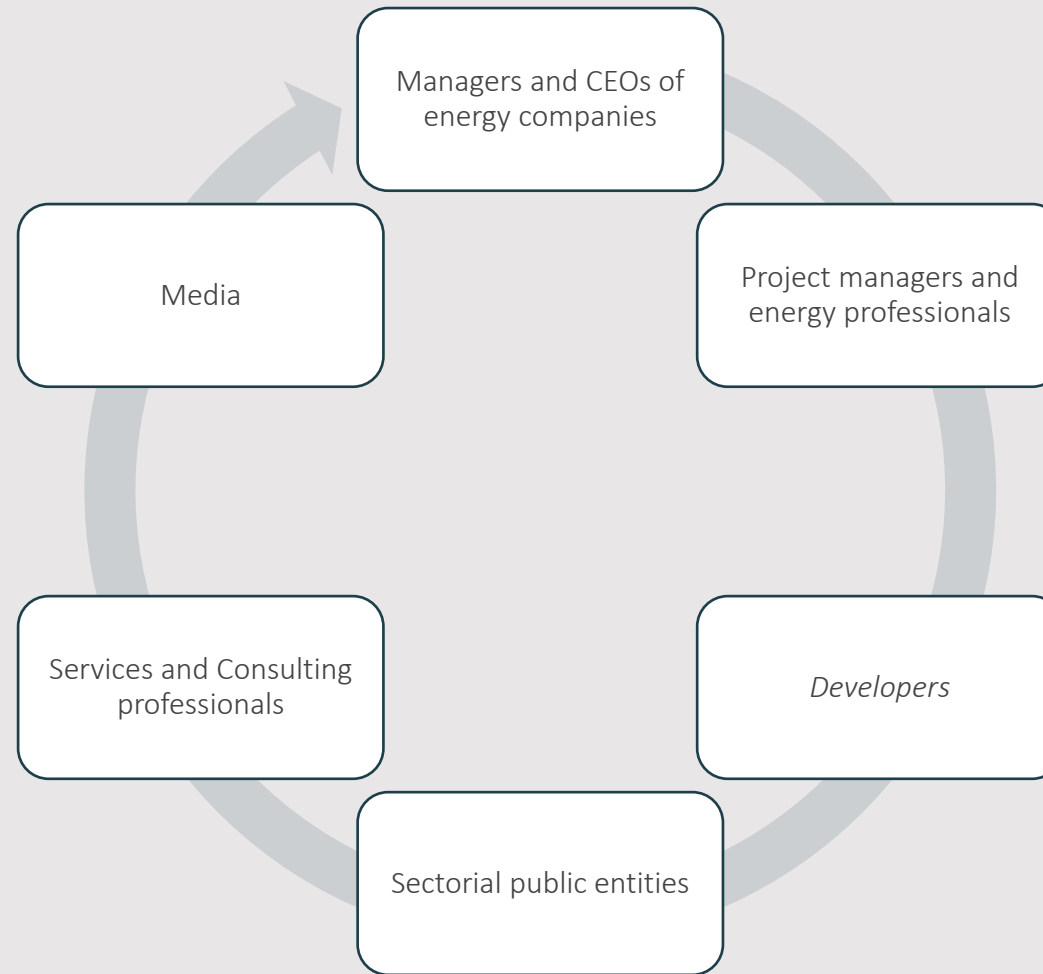

#PRES is the main conference dedicated to the renewable energy sector in Portugal and a classic hub for knowledge and networking for more than 10 years.

The main **public, governmental** and **private entities** gather in this event to debate the last updates in the sector, namely in what regards politics, regulation, strategy, and R&D.

The **big themes and issues** are discussed in **dynamic debate panels**, doing a complete analysis of the present and future of the sector.

Over **750 people**, of which **58 speakers** and **52 sponsors**, came to #PRES last year for a two-day conference & exhibition – to network, to do business, and to share insight aiming to promote the economic, environmental and social benefits renewables entail.

Who are the main actors?
